## Summary

### ID

NL-OMON20207

### Source

NTR

### Brief title

CHESNUT-STUDY

### Health condition

Angina pectoris, menopausal female

## Sponsors and support

**Primary sponsor:** Stichting ziekenhuizen West-Friesland en Waterland

Maelsonstraat 3

1624 NP Hoorn

the Netherlands

**Source(s) of monetary or material Support:** Investigator initiated onderzoek, self financing

## Intervention

## Outcome measures

### Primary outcome

Reduced number of episodes of pain or discomfort on the chest

### Secondary outcome

not applicable

## Study description

### Study objective

The use of preventive medication will lead to about 50% reduction of the symptomatic use of Nitroglycerin spray sublingual

### Study design

3 months

### Intervention

no interventions
