Summary

ID

NL-OMON22041

Source

NTR

Brief title

REDUX

Health condition

COPD, exacerbation, contact delay,(COPD, exacerbatie, contact delay)

Sponsors and support

Primary sponsor: Leiden University Medical Center

Source(s) of monetary or material Support: Lung Alliance Netherlands

Intervention

Outcome measures

Primary outcome

Amount of reduction in contact delay after adequate patient-education

Secondary outcome

Descriptive table with the main patient-characteristics

Study description

Study objective

The contact delay in COPD patients with COPD-exacerbations will be reduced by 50%, through adequate education of the COPD patients.

Study design

Comparison of contact delay before and after the patient-education in the same patients

Intervention

Patient-education on the importance of early recognition and treatment of a COPD-exacerbation, by general practice nurses and general practitioners in general practices in the Netherlands.
