

Chronic damage in ANCA-associated vasculitis

No registrations found.

Ethical review	Not applicable
Status	Pending
Health condition type	-
Study type	Observational non invasive

Summary

ID

NL-OMON23752

Source

NTR

Brief title

CD-AAV

Health condition

ANCA-associated vasculitis, granulomatosis with polyangiitis (GPA), microscopic polyangiitis (MPA), Cardiovascular disease, quality of life, depression.

Sponsors and support

Primary sponsor: Northwest Clinics

Source(s) of monetary or material Support: Foreest Medical School
Roche Nederland B.V.

Intervention

Outcome measures

Primary outcome

The prevalence of chronic damage in ANCA-associated vasculitis, defined as:

- Prevalence of cardiovascular disease

- Impaired quality of life
- Depression

Secondary outcome

- The association between damage and disease activity
- The association between damage and survival

Study description

Study objective

We hypothesize that cardiovascular disease and impaired quality of life are frequent long-term complications in AAV and often underdiagnosed.

Study design

One visit will be scheduled for all patients in which damage scores and disease activity scores will be calculated. Furthermore during this visit skin autofluorescence will be measured in all patients. Patients will fill out questionnaires on quality of life and depression in advance of the scheduled appointment.

Intervention

No intervention planned. Data will be collected from routine patient visits, questionnaires and non-invasive measurements.

Eligibility criteria

Inclusion criteria

In order to participate in this study, a subject must meet all of the following criteria:

- Diagnosis GPA or MPA in accordance with the Chapel Hill Consensus Conference guidelines
- PR3 and/or MPO ANCA positive between 2005 and 2016
- Age \geq 18 years

Exclusion criteria

- Secondary vasculitis due to rheumatoid arthritis, systemic lupus erythematosus, Sjögren's syndrome, connective tissue disease
- Drug induced vasculitis

Study design

Design

Study type:	Observational non invasive
Intervention model:	Other
Masking:	Open (masking not used)
Control:	N/A , unknown

Recruitment

NL	
Recruitment status:	Pending
Start date (anticipated):	01-09-2016
Enrollment:	70

Type:

Anticipated

Ethics review
