

Simultaneous breast reconstruction and contralateral breast symmetrisation with tissue flap

No registrations found.

Ethical review	Not applicable
Status	Recruitment stopped
Health condition type	-
Study type	Observational non invasive

Summary

ID

NL-OMON24384

Source

NTR

Health condition

Patients referred for breast reconstruction with state after mastectomy will be studied.

Sponsors and support

Primary sponsor: Brussel Universitaire Ziekenhuis (UZB)

Source(s) of monetary or material Support: Investigator initiated and funded

Intervention

Outcome measures

Primary outcome

Local recurrence of breast cancer

Secondary outcome

None

Study description

Background summary

Post-mastectomy breast reconstruction is often accompanied with a contralateral reduction mammoplasty. The 'breast sharing' procedure uses the disposable tissue as a flap to reconstruct the post-mastectomy defect. This technique enables simultaneous breast reconstruction and contralateral symmetrisation without the morbidity of an additional flap donor site. However, controversies related to the oncological safety of this procedure have prevented its uptake into regular clinical practice. We aim to assess the one-stage breast reconstruction with contralateral mammoplasty using a breast sharing procedure as a potentially oncologically safe concept.

Study objective

One-stage breast reconstruction with contralateral mammoplasty using a breast sharing procedure is an oncologically safe concept.

Study design

From 17-08-2015 to 31-08-2015 - Collection of retrospective data from case notes and photographs

Intervention

Oncological follow-up will be reviewed retrospectively.

Eligibility criteria

Inclusion criteria

Patients referred for breast reconstruction with state after mastectomy

Exclusion criteria

Patients with small contralateral breasts

Patients with N1-3,M1

Patients with tripple-negative tumours

Study design

Design

Study type:	Observational non invasive
Intervention model:	Crossover
Allocation:	Non controlled trial
Masking:	Open (masking not used)
Control:	N/A , unknown

Recruitment

NL	
Recruitment status:	Recruitment stopped
Start date (anticipated):	17-08-2015
Enrollment:	4
Type:	Actual

Ethics review
