Brief title

self referring patients

Health condition

self referring patients at the emergency department

Sponsors and support

Primary sponsor: Emergency department Rijnstate Hospital Arnhem

Source(s) of monetary or material Support: Emergency department Rijnstate Hospital Arnhem

Intervention

Outcome measures

Primary outcome

Characteristics of self referred patients at the emergency department.

The research consists of two branches:

1. Questionnaires filled in by the self referring patients;
2. Data from patients files (sex, age, triage colour, day of the week, time of presentation, additional research performed, diagnosis, hospitalisation, treatment, righty at emergency department).

Secondary outcome

N/A

Study description

Background summary

During 1 year, over 4 periods of one month we want to hand out questionnaires to self referring patients at the emergency department. Then we want to get information from the patient files. The goal is to get characteristics of this patient group.

Study objective

N/A

Study design

During 1 year: 4 periods, each 1 month.

Intervention
