## Summary

### ID

NL-OMON24786

### Source

NTR

### Health condition

Elderly residents, dementia

## Sponsors and support

**Primary sponsor:** Non

**Source(s) of monetary or material Support:** The Netherlands Organisation for Health Research and Development (ZonMw)

## Intervention

## Outcome measures

### Primary outcome

Insights into the preconditions and feasibility of participation of elderly residents with dementia.

### Secondary outcome

Handbook of patient participation.

## Study description

### Background summary

The goal of this study is to get insight into the preconditions and feasibility of participation of elderly residents with dementia en family members in nursing homes.

The study has a qualitatie explorative design using appreciative inquiry.

All elderly with dementia who live in two units in a nursing home in the southern part of the Netherlands will be included (ntotal population sampling n=41), also their family care givers (n=41).

Data are collected by means of interviews and focus groups and continuous participant observation.

Data will be analysed by context collections.

### Study objective

The goal of this study is to get insight into the preconditions and feasibility of participation of elderly residents with dementia en family members in nursing homes.

The research questions are:

Which preconditions are necessary to sucesfully implement the particiation of elderly with dementia and family members?

Which facilitators and barriers influence the feasibility?

### Study design

Continuous participant observations throughout the project. Weekly observational measurements based on the following three variables: Actors, actions, activities

### Intervention

N/A

## **Eligibility criteria**

### **Inclusion criteria**

Total population sampling: All elderly residents who live in two units in a nursing home in the southern part of the Netherlands (n=41) and their family care givers (n=41).

### **Exclusion criteria**

N/A

## **Study design**

### **Design**

Study type:	Observational non invasive
Intervention model:	Parallel
Allocation:	Non controlled trial
Masking:	Open (masking not used)
Control:	N/A , unknown

### **Recruitment**

NL	
Recruitment status:	Pending
Start date (anticipated):	01-03-2012

Enrollment: 41  
Type: Anticipated

## Ethics review

Positive opinion  
Date: 27-02-2012  
Application type: First submission
