## Summary

### ID

NL-OMON25702

### Source

Nationaal Trial Register

### Brief title

NLCS

### Health condition

Cancer

## Sponsors and support

**Primary sponsor:** Maastricht University

**Source(s) of monetary or material Support:** Dutch Cancer Society; NWO; Ministry of Health, Welfare and Sports; European Commission; Dutch Digestive Disease Foundation; American Cancer Society; World Cancer Research Fund; Dutch Asthma Fund; Dutch Kidney Foundation; Netherlands Food Safety Authority

## Intervention

## Outcome measures

### Primary outcome

Cancer incidence (frequent and infrequent types)

### **Secondary outcome**

Cause-specific mortality

## **Study description**

### **Background summary**

The Netherlands Cohort Study is a prospective cohort study ongoing since 1986 throughout the country. The study among 58279 men and 62573 women age 55-69 years aims to investigate the relationship between diet, lifestyle, genetic factors and risk of various cancers.

### **Study objective**

The Netherlands Cohort Study (NLCS) investigates the relationship between diet, lifestyle and risk of various cancers.

### **Study design**

Baseline (17-09-1986) postal questionnaire; annual cancer incidence follow-up of total cohort by record linkage to Cancer Registries and PALGA; biannual follow-up of subcohort for vital status

### **Intervention**

Not applicable: observational

## Eligibility criteria

### Inclusion criteria

General population;

Men and women, aged 55-69 years, living in 204 municipalities throughout The Netherlands

### Exclusion criteria

None

## Study design

### Design

Study type: Observational non invasive

Intervention model: Other

**Control:** N/A , unknown

### Recruitment

NL

Recruitment status: Recruitment stopped

Start date (anticipated): 17-09-1986

Enrollment: 120852

Type: Actual

## Ethics review

Positive opinion

Date: 15-12-2017

Application type: First submission

## Study registrations

### Followed up by the following (possibly more current) registration

No registrations found.

### Other (possibly less up-to-date) registrations in this register
