Study type	Interventional

Summary

ID

NL-OMON26371

Source

NTR

Brief title

N/A

Health condition

Patients with birch pollen allergy and related hazelnut allergy.

Sponsors and support

Primary sponsor: ALK-ABELLO, Nieuwegein, The Netherlands

Intervention

Outcome measures

Primary outcome

DBPCFC with hazelnut before immunotherapy with birch pollen and after 1 year.

Secondary outcome

Skin prick tests and serological analyses.

Study description

Background summary

The effect of birch pollen immunotherapy on cross reactive food allergies is controversial. In this study the effect of birch pollen immunotherapy on hazelnut allergy is investigated with DBPCFC and skin prick tests as monitoring tools.

Study objective

The severity of hazelnut allergy will decrease as an additional effect by birch pollen immunotherapy.

Study design

N/A

Intervention

Immunotherapy with birch pollen extract .
