No registrations found.

<b>Ethical review</b>	Not applicable
<b>Status</b>	Recruitment stopped
<b>Health condition type</b>	-
<b>Study type</b>	Observational non invasive

## Summary

### ID

NL-OMON26421

### Source

NTR

### Brief title

IRRITANT

### Health condition

Quality of Recovery, kwaliteit van herstel

## Sponsors and support

**Primary sponsor:** AMC Amsterdam

**Source(s) of monetary or material Support:** Initiator

## Intervention

## Outcome measures

### Primary outcome

- Psychometric properties of the Dutch translated version of the QoR-40 and the IPO
- Cross cultural validity

### Secondary outcome

- Correlation between the QoR-40 and the IPO scores

## Study description

### Background summary

Rationale: The QoR-40 and IPO are sophisticated outcome measurement tools that assess several outcome domains of post-surgical recovery. Both are validated in English, with good psychometric properties. The difference between the instruments lies in the domains they address; the IPO has an additional question about patient satisfaction.

The questionnaires are widely used and are translated in several languages. However, they are not yet translated and validated in the Dutch language. Therefore we will translate the questionnaires in Dutch and validate them in the Dutch language.

Study design: Single center prospective cohort study

Methods: Forward and back translation; Assessment of psychometric properties of Dutch version of the QoR-40 and the IPO.

### Study objective

Determination of the psychometric properties of the Dutch translated version of the QoR-40 and the IPO

### Study design

Day 1 post-operative questionnaires

Day 3 post-operative questionnaires

### Intervention

None

## Eligibility criteria

### Inclusion criteria

- Elective minor, moderate or major surgery, according to the definition of the European Society of Anaesthesiology
- Female / Male, Age >18
- Fluent in Dutch

### Exclusion criteria

- ASA IV or above
- Emergency surgery

## Study design

### Design

Study type:	Observational non invasive
Intervention model:	Other
Masking:	Open (masking not used)
Control:	N/A , unknown

## Recruitment

NL	
Recruitment status:	Recruitment stopped
Start date (anticipated):	01-04-2018
Enrollment:	200
Type:	Actual

## IPD sharing statement

**Plan to share IPD:** Undecided

## Ethics review

Not applicable	
Application type:	Not applicable

## Study registrations

### Followed up by the following (possibly more current) registration

No registrations found.

### Other (possibly less up-to-date) registrations in this register

No registrations found.
