Study type	Observational non invasive

Summary

ID

NL-OMON26443

Source

Nationaal Trial Register

Brief title

none

Health condition

Analysing the vision and opinion of opinionleaders on how the doctor-patient relation is meaningfull for the complex care for MUS patients. More specific how the opinionleader -out of his vision, his conceptual modell- takes part in this relationship and possibly uses the relationship as a powerful and important tool to care/treat the patients with chronical MUS.

Intervention

Outcome measures

Primary outcome

Analysis and the vision and opinion of opinionleaders on MUS and patients suffering from MUS, and on (possible differering) underlying philosophies, conceptual modell and explanationmodell of MUS. If possible to create a (more) integrative modell.

Secondary outcome

Analysis of the vision and opinion of opinionleaders about how the doctor-patient-relation has a meaning to the complex care for MUS patients. More specific also how the expert (out of his vision, his conceptual model) is taking part of this relationship and possibly uses the relationship itself as a powerful and important tool to treat/care for patients with chronic MUS.

Study description

Study objective

The doctor-patient-relation is a powerful and important tool in the complex care for patients with (chronical) MUS.

Study design

n.v.t.

Intervention

Qualitative research based on semi structured interviews with MUS-opinionleaders, using purposive expert sampling.

Eligibility criteria

Inclusion criteria

doctor, opinion leader in care for patients with MUS (medically unexplained symptoms)

Exclusion criteria

no

Study design

Design

Study type:	Observational non invasive
Intervention model:	Parallel
Allocation:	Non controlled trial
Masking:	Open (masking not used)
Control:	N/A , unknown

Recruitment

NL	
Recruitment status:	Other
Start date (anticipated):	26-03-2015
Enrollment:	15
Type:	Unknown

Ethics review

Positive opinion

Date: 20-03-2015
Application type: First submission
