Intervention

Outcome measures

Primary outcome

Ocular pressure on treatment day.

Secondary outcome

N/A

Study description

Background summary

N/A

Study objective

Administration of Ibopamine hydrochloride eye drops restores intraocular pressure in patients with hypotony following vitreoretinal surgery or uveitis.

Intervention

Treatment with Ibopamine hydrochloride (0.5 % or 2%) eye drops or placebo.

Eligibility criteria

Inclusion criteria

1. Hypotony (0-5 mm Hg);
2. Stable eye pressure for at least 4 months;
3. No reaction of eye pressure to atropine and steroids;
4. Continued steroid treatment during past six months;
5. Status after vitreoretinal surgery or uveitis.

Exclusion criteria

1. Chronical heart failure;
2. Traction on corpus ciliare;
3. Cyclodialysis.

Study design

Design

Study type:	Interventional
Intervention model:	Crossover
Masking:	Single blinded (masking used)
Control:	Placebo

Recruitment

NL	
Recruitment status:	Recruitment stopped
Start date (anticipated):	01-01-2003
Enrollment:	15
Type:	Actual

Ethics review

Positive opinion	
Date:	23-08-2005
Application type:	First submission
