Health condition

Self-management support by health care providers

Sponsors and support

Primary sponsor: Boehringer Ingelheim bv

Source(s) of monetary or material Support: Boehringer Ingelheim bv

Intervention

Outcome measures

Primary outcome

Correlation of .8 between PCRS and ACIC self-management subscale, measured by Pearson's r. No correlation between PCRS and perceived self-management support (convergent validity)

Secondary outcome

Correlation of .8 between PCRS and ACIC self-management subscale, independent of specific health care function

Study description

Study objective

The Dutch version of the PCRS is a valid and reliable instrument to assess self-management support

Study design

In a 3 month period, HCPs are asked to complete the questionnaires on t=0 and only the PCRS on t=1 (2 weeks after completion of questionnaires on t=0)

Intervention

None, this is a questionnaire validation study. The used questionnaires are: PCRS, ACIC, CS-PAM and ITEM
