<b>Study type</b>	Observational non invasive

## Summary

### ID

NL-OMON26969

### Source

Nationaal Trial Register

### Brief title

Cervical cerclage to prevent preterm birth: retrospective cohort study

### Health condition

Cerclage during pregnancy to prevent preterm birth

## Sponsors and support

**Primary sponsor:** Máxima MC

**Source(s) of monetary or material Support:** N/A

## Intervention

## Outcome measures

### Primary outcome

Gestational age at delivery, classified by indication for cerclage procedure

### Secondary outcome

Maternal and neonatal delivery outcomes

## Study description

### Background summary

In this retrospective cohort study, we would like to determine the delivery outcomes of women who underwent cervical cerclage placement, classified by indication for cerclage placement. Besides, we would like to determine the complication rates of this procedure.

### Study objective

Cervical cerclage should extend the pregnancy with several weeks

### Study design

Start of study: 26-11-2019

### Intervention

Cerclage procedure

## Eligibility criteria

## Inclusion criteria

All women who underwent a cerclage procedure during pregnancy in the period 01-01-2000 until 01-07-2020

## Exclusion criteria

Women aged under 18 years

## Study design

### Design

Study type:	Observational non invasive
Intervention model:	Other
Allocation:	Non controlled trial
Masking:	Open (masking not used)
Control:	N/A , unknown

### Recruitment

NL	
Recruitment status:	Recruiting
Start date (anticipated):	26-11-2019
Enrollment:	150
Type:	Anticipated

### IPD sharing statement

**Plan to share IPD:** Undecided

## Ethics review

Positive opinion	
Date:	04-12-2019
Application type:	First submission

## Study registrations

### Followed up by the following (possibly more current) registration

No registrations found.
