## Summary

### ID

NL-OMON27082

### Source

NTR

### Brief title

FUPEC study

### Health condition

This study focusses on cardiovascular disease prevention in women who had severe pre-eclampsia

## Sponsors and support

**Primary sponsor:** None

**Source(s) of monetary or material Support:** investigator initiated

## Intervention

## Outcome measures

### Primary outcome

cardiovascular risk factors, subclinical atherosclerosis, cardiovascular disease

### Secondary outcome

outcome subsequent pregnancy,

## Study description

### Background summary

The FUPEC study is an open cohort study studying long-term cardiovascular follow-up in women who had severe pre-eclampsia (according to the American Congress of Obstetricians and Gynecologists 2002 criteria) who attended the FUPEC clinic. Data collection includes clinical information about medical and obstetric history, questionnaires, cardiovascular risk factors, cardiovascular health score metrics imaging of subclinical atherosclerosis and cardiovascular events and biological samples. The aim of the study is that results derived from the FUPEC study will be implemented in health care practice to optimize cardiovascular prevention with the ultimate goal to reduce cardiovascular disease in women who experienced pre-eclampsia in pregnancy.

### Study objective

Early cardiovascular risk management focussed on cardiovascular health can prevent cardiovascular disease in women who had severe pre-eclampsia

### Study design

6 weeks, 3 months, 1 year, 3,5,7,9 etc years postpartum

## Eligibility criteria

## Inclusion criteria

History of severe pre-eclampsia, age >17 and <51 years

## Exclusion criteria

None

## Study design

### Design

Study type:	Observational non invasive
Intervention model:	Other
Allocation:	Non controlled trial
Masking:	Open (masking not used)
Control:	N/A , unknown

### Recruitment

NL	
Recruitment status:	Recruiting
Start date (anticipated):	01-02-2011
Enrollment:	1500
Type:	Anticipated

### IPD sharing statement

**Plan to share IPD:** Undecided

## Ethics review

Positive opinion	
Date:	28-04-2021
Application type:	First submission

## Study registrations
