

# A decision aid for the treatment of Benign Prostatic Hyperplasia

No registrations found.

<b>Ethical review</b>	Positive opinion
<b>Status</b>	Recruiting
<b>Health condition type</b>	-
<b>Study type</b>	Interventional

## Summary

### ID

NL-OMON27217

### Source

Nationaal Trial Register

### Brief title

BPH DA

### Health condition

DA BPH

## Sponsors and support

**Source(s) of monetary or material Support:** Stichting Delectus

## Intervention

## Outcome measures

### Primary outcome

value congruence and regret

### Secondary outcome

decisional conflict, SCIP-B, SDM-Q-9, EORTC-info-25, knowledge

## Study description

### Background summary

a prospective cohort study to investigate the effect of a decision aid for benign prostatic hyperplasia compared to a historical control cohort.

### Study objective

Patients who have used the decision aid for making the treatment choice for benign prostatic hyperplasia: feel more informed, have more knowledge about the disease, feel more involved in making the decision, make a more value congruent choice, have less regret,

### Study design

T1: after using decision aid

T2: 3-6 months after treatment choice

### Intervention

using a BPH decision aid
