

Long-term treatment of deep vein thrombosis or pulmonary embolism in patients with cancer

No registrations found.

Ethical review	Not applicable
Status	Pending
Health condition type	-
Study type	Observational non invasive

Summary

ID

NL-OMON28644

Source

NTR

Brief title

LONGHEVA registry

Health condition

pulmonary embolism
deep vein thrombosis
venous thromboembolism
cancer
kanker
longembolie
diep veneuze trombose
veneuze trombo-embolie

Sponsors and support

Primary sponsor: University Medical Center Groningen

Source(s) of monetary or material Support: LEO Pharma

Intervention

Outcome measures

Primary outcome

recurrence of VTE

bleeding events

mortality

Secondary outcome

risk factors of recurrent VTE

Study description

Study design

baseline, 3, 6, 9, 12 months

Intervention

none

Eligibility criteria

Inclusion criteria

Patients with cancer (excluding non-melanoma skin cancer)

Confirmed diagnosis of acute pulmonary embolism or deep venous thrombosis

Exclusion criteria

legal age limitations

Study design

Design

Study type: Observational non invasive

Intervention model: Other

Control: N/A , unknown

Recruitment

NL

Recruitment status: Pending

Start date (anticipated): 01-07-2015

Enrollment: 200

Type: Anticipated

Ethics review

Not applicable

Application type:

Not applicable
