Intervention

Outcome measures

Primary outcome

Individually Prioritized Problem Assessment (IPPA)

Secondary outcome

10-point playfulness scale

Children's viewpoint using 3 different smileys

Study description

Background summary

This study aims to explore the effects on the achievement of goals and the ideal conditions of a ZORA robot-based play intervention within rehabilitation and special education for children with severe physical disabilities with a developmental age between 2-8 years. A multi-center study will be conducted over a 6 month period (May-Oktober 2017) involving children with severe physical disabilities with a developmental age between 2-8 years old. During 6 weeks, children can play with ZORA once a week, in a therapeutic or education session (group or individual).

Study design

6 weeks

Intervention

Therapy or special education with the ZORA robot.

Eligibility criteria

Inclusion criteria

- Child with severe physical disability (e.g. cerebral palsy, spina bifida, acquired brain injury)
- Developmental age 2-8 years
- Chronological age 2-18 years
- Stable cardio-pulmonary status

Exclusion criteria

- Epilepsy
- Deafness
- Blindness
- Severe aggressive behaviour

Study design

Design

Study type:	Interventional
Intervention model:	Other
Allocation:	Non controlled trial
Masking:	Open (masking not used)
Control:	N/A , unknown

Recruitment

NL

Recruitment status:	Other
Start date (anticipated):	15-05-2017
Enrollment:	30
Type:	Unknown

Ethics review

Positive opinion	
Date:	06-04-2017
Application type:	First submission
