## Summary

### ID

NL-OMON29067

### Source

NTR

### Brief title

COMPARE-Q

### Health condition

IPF

## Sponsors and support

**Primary sponsor:** Pendersfonds

**Source(s) of monetary or material Support:** St Antonius hospital

## Intervention

## Outcome measures

### Primary outcome

interview data

## Study description

### Background summary

This is a qualitative study exploring the needs, facilitators and barriers for communication about end of life from the perspective of patients with pulmonary fibrosis, their informal care givers and health care professionals.

In this study interviews and focus groups will be used to collect data.

### Study objective

Because of the qualitative nature of this study, no hypothesis is applicable

### Study design

All participants will participate only once in an interview or a focus group.

### Intervention

Interviews and focus groups

## Eligibility criteria

### Inclusion criteria

In order to be eligible to participate in this study, a subject must meet the following criteria:

- IPF diagnoses by the ATS 2018 criteria
- OR
- Informal caregiver of a patient with IPF diagnosed by the ATS 2018 criteria;
- OR
- Bereaved informal caregiver of a patient with IPF diagnosed by the ATS 2018 criteria\*;

## Exclusion criteria

- Not able to speak Dutch;
- Not able to work with Pexip ;
- Patients with other chronic lung diseases;
- Patients <18 years;
- Patients on waiting list LoTX

## Study design

### Design

Study type:	Observational non invasive
Intervention model:	Other
Allocation:	Non controlled trial
Masking:	Open (masking not used)
Control:	N/A , unknown

### Recruitment

NL	
Recruitment status:	Pending
Start date (anticipated):	01-03-2021
Enrollment:	30
Type:	Anticipated

### IPD sharing statement

**Plan to share IPD:** No

## Ethics review

Positive opinion

Date: 19-02-2021

Application type: First submission
