Brief title

Patients' view on the prevention of preterm birth

Condition

- Pregnancy, labour, delivery and postpartum conditions

Synonym

Premature birth, preterm birth

Research involving

Human

Sponsors and support

Primary sponsor: Zorgonderzoek Nederland (ZON)

Source(s) of monetary or material Support: ZonMw

Intervention

Keyword: Bacterial vaginosis, Implementation, Preterm birth, Progesterone

Outcome measures

Primary outcome

- Attitude towards prevention strategies
- Knowledge of preterm birth

Secondary outcome

Not applicable.

Study description

Background summary

The administration of progesterone and the treatment of bacterial vaginosis have been proven to be effective in preventing preterm birth in women with a previous preterm birth. Since the publication of the evidence voor this prevention strategy, several Dutch obstetric clinics have started implementation. However, registration of performed treatment shows that this strategy is by far not applied in all eligible cases.

Study objective

The aim of this study is to identify factors that can hamper or facilitate the implementation and to use this knowledge to develop an effective implementation strategy.

Study design

Participants will be interviewed on their view of preterm birth and the prevention of preterm birth. This will be done by means of a single electronic or paper questionnaire.

Study burden and risks

Very low burden.

Eligibility criteria

Age

Adults (18-64 years)

Elderly (65 years and older)

Inclusion criteria

Previous spontaneous preterm birth

New pregnancy or desire to become pregnant

Exclusion criteria

Iatrogenic preterm birth (induction, caesarean section)

Multiple pregnancy

Study design

Design

Study type: Observational non invasive

Masking: Open (masking not used)

Control: Uncontrolled

Primary purpose: Prevention

Recruitment

NL

Recruitment status: Recruitment stopped

Start date (anticipated): 17-07-2007

Enrollment: 100

Type: Actual

Ethics review

Approved WMO

Date: 25-06-2007

Application type: First submission

Review commission: METC Maxima Medisch Centrum (Veldhoven)
