

# Development of a human co-culture model for inflammation and sensitisation in the skin.

Published: 12-06-2007

Last updated: 08-05-2024

objective

<b>Ethical review</b>	Approved WMO
<b>Status</b>	Pending
<b>Health condition type</b>	Autoimmune disorders
<b>Study type</b>	Observational invasive

## Summary

### ID

NL-OMON31357

### Source

ToetsingOnline

### Brief title

Human co-culture model

### Condition

- Autoimmune disorders
- Epidermal and dermal conditions

### Synonym

Psoriasis, scaly skin disease

### Research involving

Human

### Sponsors and support

**Primary sponsor:** TNO

**Source(s) of monetary or material Support:** Interne TNO subsidie vraaggestuurde programma's

## Intervention

**Keyword:** co-culture, human, inflammation, skin

## Outcome measures

### Primary outcome

primary study parameters

### Secondary outcome

not applicable

## Study description

### Background summary

background.

### Study objective

objective

### Study design

study design

### Study burden and risks

nature and extent

## Trial sites

### Listed location countries

Netherlands

## Eligibility criteria

### Age

Adults (18-64 years)

Elderly (65 years and older)

### Inclusion criteria

Adult (male/female) patients suffering from a mild form of psoriasis vulgaris (not exceeding a PASI score of 6)

### Exclusion criteria

Patients may not undergo light therapy or any other form of systemic treatment (methotrexate, cyclosporine A, TNF therapy)

## Study design

### Design

**Study type:** Observational invasive

Masking: Open (masking not used)

Control: Uncontrolled

Primary purpose: Other

## Recruitment

NL  
Recruitment status: Pending  
Start date (anticipated): 15-02-2007  
Enrollment: 7  
Type: Anticipated

## Ethics review

Approved WMO  
Application type: First submission  
Review commission: METC Brabant (Tilburg)

## Study registrations

### Followed up by the following (possibly more current) registration

No registrations found.
