Brief title

LTMS

Condition

- Other condition

Synonym

operations, surgery

Health condition

operatieve patienten

Research involving

Human

Sponsors and support

Primary sponsor: Leids Universitair Medisch Centrum

Source(s) of monetary or material Support: Ministerie van OC&W

Intervention

Keyword: surgery, temperature

Outcome measures

Primary outcome

Postoperative temperature

Secondary outcome

age/weight, etc.

Study description

Background summary

Perioperative patients have a chance of becoming hypothermic. In this study we will assess the effect of preoperative warming on postoperative temperature development.

Study objective

To assess the effect of preoperative warming on postoperative temperature.

Study design

Open/randomized

Study burden and risks

none

Eligibility criteria

Age

Adults (18-64 years)

Elderly (65 years and older)

Inclusion criteria

All patients undergoing orthopedic surgery > 18 yrs.

Exclusion criteria

< 18 yrs

Study design

Design

| | |
|---------------------|-----------------------------|
| Study type: | Observational non invasive |
| Intervention model: | Parallel |
| Allocation: | Randomized controlled trial |
| Masking: | Open (masking not used) |

Primary purpose: Prevention

Recruitment

NL

Recruitment status: Pending

Start date (anticipated): 01-05-2007

Enrollment: 75

Type: Anticipated

Ethics review

Approved WMO

Application type: First submission

Review commission: METC Leids Universitair Medisch Centrum (Leiden)
