## Intervention

**Keyword:** care en support, dual diagnosis, nursing, substance use disorder

## Outcome measures

### Primary outcome

- Need / no need of the patient on 22 living areas
- social behavior; spread over 7 zones with 79 items
- coping styles in 7 different subscales
- perceived quality of life, twelve different areas of life

### Secondary outcome

not applicable

## Study description

### Background summary

Psychiatry and addiction go hand in hand, relatively often. On the basis of the results of national and international research could be said that dual diagnosis with the component Substance Use Disorder (SUD) is quite a problem. There is no scientific knowledge regarding the need for nursing care and support on behalf of patients with SUD and ADHD and/or PDD.

Research question:. What is the need for nursing care and support on behalf of patients with SUD and ADHD and/or PDD.

### Study objective

To gain insight regarding the need for nursing care and support on behalf of

patients with SUD and ADHD and/or PDD. Acquisition of knowledge about the disease experience by the patient is important as a basis for professional nursing knowledge about the target group.

## **Study design**

The target group that this research is on, is made up of patients with SUD and ADHD and/or PDD.

The interview will start with five exploring questions. Then 4 questionnaires will be hold.

- Camberwell Assessment of Needs
- Scale for social functioning
- Utrecht Coping list
- Manchester short Assessment of Quality of life.

The results of the exploring questions will be presented by afterwards and inductive coding. Results of the questionnaires will be presented and will be compared with each other.

## **Study burden and risks**

For the patient: Tax Time 90 min, no risks.

For the next person: Tax Time 45 mins, no risks.

## Trial sites

### Listed location countries

Netherlands

## Eligibility criteria

### Age

Adults (18-64 years)

Elderly (65 years and older)

### Inclusion criteria

Adult Patients with -SUD

-SUD and ADHD

-SUD and PDD

-SUD and ADHD/PDD

### Exclusion criteria

Patients who do not speak Dutch

patients with somatic complains who are not the direct result of SUD

## Study design

### Design

**Study type:** Observational non invasive

Masking: Open (masking not used)

Control: Uncontrolled

Primary purpose: Health services research

### Recruitment

NL

Recruitment status: Recruiting

Start date (anticipated):	16-07-2010
Enrollment:	140
Type:	Actual

## Ethics review

Approved WMO	
Date:	30-03-2010
Application type:	First submission
Review commission:	CMO regio Arnhem-Nijmegen (Nijmegen)
