Brief title

Client IMplementation PatientCoach (CIMP)

Condition

- Cardiac disorders, signs and symptoms NEC
- Glucose metabolism disorders (incl diabetes mellitus)
- Bronchial disorders (excl neoplasms)

Synonym

astma, COPD, Diabetes Mellitus, high bloodpressure, Hypertension

Research involving

Human

Sponsors and support

Primary sponsor: Academisch Medisch Centrum

Source(s) of monetary or material Support: zorgverzekeraar;bedrijven

Intervention

Keyword: chronic disease, e-health, implementation, selfmanagement

Outcome measures

Primary outcome

Selfmanagement parameters

Secondary outcome

not applicable

Study description

Background summary

Selfmanagement improves quality of life in patients with asthma and COPD, hypertension and/or Diabetes Mellitus. However, in daily practice only a few tools are available to stimulate patients to control their disease. PatientCoach may be useful in supporting selfmanagement. In order to implement PatientCoach, we will evaluate the usability of PatientCoach.

Study objective

The purpose of the study is to evaluate the usability of PatientCoach by patients with asthma and/ or COPD, hypertension and/or Diabetes Mellitus.
