## **Summary**

## ID

NL-OMON52855

#### Source

ToetsingOnline

#### **Brief title**

**TAPE-study** 

## **Condition**

- Other condition
- Eating disorders and disturbances

#### **Synonym**

Eating disorder, Posttraumatic stress disorder, PTSD

## **Health condition**

Angststoornissen en symptomen (posttraumatische stressstoornis)

## Research involving

Human

## **Sponsors and support**

**Primary sponsor:** Parnassiagroep

Source(s) of monetary or material Support: Ministerie van OC&W

## Intervention

**Keyword:** Comorbidity, Eating disorders, Exposure therapy, Posttraumatic stress disorder

## **Outcome measures**

## **Primary outcome**

The primary study parameter is decrease of weekly measured PTSD symptom severity after the onset of exposure therapy compared to baseline.

## **Secondary outcome**

The secondary parameters are to investigate the feasibility of exposure therapy for PTSD in ED population, to measure the initial effect of exposure therapy on secondary clinical outcomes and to measure whether the intervention effects are maintained over time.

# **Study description**

## **Background summary**

A frequently occurring comorbidity in eating disorders (ED) is posttraumatic stress disorder (PTSD). However, controlled studies on treatment of PTSD in ED are scarce. Expert opinion states concurrent treatment of ED and PTSD, but research in this field is in its nascent stages.

## **Study objective**

The current study is an initial evaluation of the feasibility and effects of exposure therapy in those suffering from ED and comorbid PTSD.

## Study design

Two separate multiple baseline case series.

2 - Trauma-focused exposure therapy for posttraumatic stress disorder in patients wi ... 6-05-2025

## Intervention

Participants will receive 10 session exposure therapy for PTSD which will be added on treatment as usual (TAU) for ED.

## Study burden and risks

No significant risks are associated with participation. The burden for the patients is relatively low, involving additional measurements incorporated in clinical routine. There are no direct benefits for participants.

# **Eligibility criteria**

#### Age

Adults (18-64 years)

## Inclusion criteria

## Study 1:

- Female outpatients with anorexia nervosa, or otherwise specified feeding or eating disorder with anorexia nervosa symptoms (atypical AN) and posttraumatic stress disorder diagnosis according to DSM-5
- Age 18-65
- Body Mass Index >=15
- Informed consent
- Enrollment in outpatient eating disorder treatment

## Study 2:

- Female outpatients with bulimia nervosa, binge eating disorder, otherwise specified feeding or eating disorder with bulimia nervosa or binge eating disorder symptoms and posttraumatic stress disorder diagnosis according to DSM-5
- Age 18-65
- Body Mass Index >=15
- Informed consent
- Enrollment in outpatient ED treatment

## **Exclusion criteria**

## Study 1:

- Current PTSD treatment
- Other concurrent psychological treatment during the duration of the study than the studied intervention of exposure therapy and TAU for ED.
- DSM-5 diagnosis of BN, BED, OSFED with BN or BED symptoms, Avoidant Restrictive Food Intake Disorder, night eating syndrome or purging disorder
- Psychotic disorder
- Medical instability (hospital admission required) or pregnancy
- Changes in psychotropic medication in the two months prior to inclusion
- High risk of suicidality in the last two months (High suicidality score on MINI-plus and a suicide attempt in the past 6 months)
- Severe non-suicidal self-injury (NSSI) in the last two months (hospital referral

#### required)

- Insufficient proficiency in the Dutch language
- Alcohol or drug dependency in last two months
- Cognitive impairment (estimated IQ < 70)

#### Study 2:

- DSM-5 diagnosis of AN, OSFED with AN symptoms, Avoidant Restrictive Food Intake Disorder, night eating syndrome or purging disorder
- Current PTSD treatment
- Other concurrent psychological treatment during the duration of the study than the studied intervention of exposure therapy and TAU for ED.
- Psychotic disorder
