Intervention

- Other intervention

Explanation

N.a.

Outcome measures

Primary outcome

Insight in needs and recommendations for policy and practice of senior Dutch people

Secondary outcome

NA

Study description

Background summary

Society is aging, and the demand for support is increasing. This research focuses on how middle-aged people in the northern Netherlands, both with and without a migration background, prepare for aging. Preparing for aging is a crucial topic to enable older adults to live at home for as long as possible.

Middle-aged individuals (47-63 years old) are in a phase of life where they make important decisions about health, housing, finances, and social networks. For people with a migration background, a complex mix of cultural, social, and structural factors often influences their preparation.

Little is known about how this group prepares for aging and what they need to make this transition successful.

Study objective

How do middle-aged people in the northern Netherlands, both with and without a migration background, prepare for aging, and what support do they need?

Study design

observational study, with interviews (qualitative study design)

Intervention

seniors/ middle-aged people

Study burden and risks

no burden or risks are involved. Benefit is more understanding and adjustment of policy and practice for senior Dutch people.

Eligibility criteria

Age

Adults (18-64 years)

Inclusion criteria

age between 48 and 64

Exclusion criteria

not target population/ not living in Northern Netherlands

Study design

Design

Study phase:	N/A
Study type:	Observational non invasive
Intervention model:	Single
Allocation:	Non controlled trial
Masking:	Open (masking not used)
Control:	Uncontrolled
Primary purpose:	Health services research

Recruitment

NL	
Recruitment status:	Pending
Start date (anticipated):	01-02-2025
Enrollment:	30
Duration:	5 months (per patient)
Type:	Anticipated

IPD sharing statement

Plan to share IPD: Yes

Plan description

data is stored at the Groningen University repository for researchers, at Aletta Jacobs School of Public Health

Interviews will be transcribed, after transcription the recordings are deleted and all data will be stored anonymously and stored with respect to the legal storing time.

Data is available upon request by the researchers for further analysis or reuse.

Ethics review

Not available

Date: 13-03-2025

Application type: First submission

Review commission: CCMO
