Aandoening

Crowding, Netherlands, Dutch, Emergency Department, Patient characteristics

Ondersteuning

Primaire sponsor: Emile van der Have, Emergency Physician resident (co-founder, main researcher),

Gideon Latten, Emergency Physician (founder),

Zuyderland Medisch Centrum, (organisation)

Overige ondersteuning: No additional funding or financing.

Onderzoeksproduct en/of interventie

Uitkomstmaten

Primaire uitkomstmaten

Patient characteristics/factors which are associated with a length of stay of 4 hours or longer.

Toelichting onderzoek

Achtergrond van het onderzoek

Emergency Department crowding is a problem which arises worldwide. Compared to other Western countries there does not seem to be a major crowding problem in the Netherlands yet, but there are publications that suggest that there is an increasing frequency of crowding in the Dutch Emergency Departments.

Crowding and a longer length of stay are associated with negative patient related outcomes.

To date there has not been any study which investigates the patient characteristics which are associated with a longer length of stay in the Emergency Department in the Netherlands.

The aim of this study is to identify the patient characteristics which are associated with a longer length of stay in the Emergency Department in a large general hospital in the Netherlands

Onderzoeksopzet

-

Onderzoeksproduct en/of interventie

No interventions.

Comparison of the patient group with a length of stay shorter than 4 hours with the patient group with a length of stay of 4 hours or longer.

Deelname eisen

Belangrijkste voorwaarden om deel te mogen nemen (Inclusiecriteria)

All patients which visited our Emergency Department in 2014.
There will be two groups, a group with a length of stay shorter than 4 hours and a group with a length of stay of 4 hours or longer.

Belangrijkste redenen om niet deel te kunnen nemen (Exclusiecriteria)

Patients without registration of time of arrival or departure.

Patients with an unreliable length of stay.

The patients registered in our database, but that actually were admitted to the emergency cardiac care.
