Samenvatting

ID

NL-OMON22544

Bron

Nationaal Trial Register

Verkorte titel

CUREiHUS

Aandoening

atypische hemolytisch uremisch syndroom, atypical hemolytic uremic syndrome, complement system, eculizumab, restrictive treatment regimen, orphan drugs, weesgeneesmiddel

Ondersteuning

Primaire sponsor: Radboud university medical center

Overige ondersteuning: ZonMw, Zorgverzekeraars Nederland, Goed Gebruik Geneesmiddelen (project number 836031008)

Onderzoeksproduct en/of interventie

Uitkomstmaten

Primaire uitkomstmaten

Monitoring and evaluation of the Dutch guideline for treatment of aHUS in children and adults during two years.

Toelichting onderzoek

Achtergrond van het onderzoek

Atypical hemolytic uremic syndrome (aHUS) is a rare, but severe form of thrombotic microangiopathy, and is considered the consequence of complement dysregulation. Atypical HUS has

a poor outcome with mortality up to 10% and over 50% of patients developing end stage renal

disease. Since the end of 2012, these outcomes have greatly improved with the introduction of

eculizumab.

The European Medicines Agency has approved eculizumab for the treatment of aHUS

patients. The guideline advocates lifelong treatment. However, there is no hard evidence to support

this advice. Historically, a substantial number of aHUS patients were weaned of plasma therapy,

often without disease recurrence. Moreover, the long-term consequences of eculizumab treatment

are unknown.

Recently, a new guideline concerning therapy in aHUS patients and hereby addressing therapy adjustment and/or discontinuation in aHUS patients is implemented in the Netherlands. In

this national, multicenter, observational study we will include all aHUS, both pediatric and adults,

patients who are treated conform this new guideline. During four years this guideline will be monitored and evaluated.

Doel van het onderzoek

Onderzoeksopzet

Observational study for two years

Onderzoeksproduct en/of interventie

None

Deelname eisen

Belangrijkste voorwaarden om deel te mogen nemen (Inclusiecriteria)

1. Patients of all ages, suspected of or diagnosed with aHUS

2. Treated conform the new Dutch guideline for aHUS.
3. Subject and/or his parents is able and willing to sign the Informed Consent

Belangrijkste redenen om niet deel te kunnen nemen (Exclusiecriteria)

- 1, Subject and/or his parents is not able or willing to sign the Informed Consent before start of the study.
2. Patients with other etiological forms of HUS than aHUS
