### Onderzoeksproduct en/of interventie

### Uitkomstmaten

#### Primaire uitkomstmaten

Insights into the preconditions and feasibility of participation of elderly residents with dementia.

# Toelichting onderzoek

## Achtergrond van het onderzoek

The goal of this study is to get insight into the preconditions and feasibility of participation of elderly residents with dementia en family members in nursing homes.

The study has a kwalitatieve explorative design using appreciative inquiry.

All elderly with dementia who live in two units in a nursing home in the southern part of the Netherlands will be included (total population sampling  $n=41$ ), also their family care givers ( $n=41$ ).

Data are collected by means of interviews and focus groups and continuous participant observation.

Data will be analysed by content collections.

## Doel van het onderzoek

The goal of this study is to get insight into the preconditions and feasibility of participation of elderly residents with dementia en family members in nursing homes.

The research questions are:

Which preconditions are necessary to successfully implement the participation of elderly with dementia and family members?

Which facilitators and barriers influence the feasibility?

## Onderzoeksopzet

Continuous participant observations throughout the project. Weekly observational measurements based on the following three variables: Actors, actions, activities
