Uitkomstmaten

Primaire uitkomstmaten

Nutritional status and habits of the children aged 0.5-12 y in Indonesia, Malaysia, Thailand

and Vietnam. The nutritional status will be assessed based on physical measurements and analysis of blood samples of selected nutrients. Nutritional habits will be assessed with food frequency and habit questionnaires. All measurements will be carried out during daytime.

Toelichting onderzoek

Achtergrond van het onderzoek

Background:

Knowledge about nutritional status and habits of children will facilitate designing strategies for improvement of their nutritional status. However, national wide data are not complete or even scarce for children in the Southeast countries.

Objective:

The nutritional status and habits of the children aged 0.5-12 y in Indonesia, Malaysia, Thailand and Vietnam. DESIGN: In total 16644 children aged 0.5-12 y will be recruited. The nutritional status will be assessed based on physical measurements and analysis of blood samples of selected nutrients. Nutritional habits will be assessed with food frequency and habit questionnaires. Furthermore, physical activity and cognitive function of the children will be assessed with questionnaires.

Doel van het onderzoek

To assess the nutritional status and dietary habits of children aged 0.5-12 years in Indonesia, Malaysia, Thailand and Vietnam.

Onderzoeksopzet

Duration of the study is 23 months.

Deelname eisen

Belangrijkste voorwaarden om deel te mogen nemen (Inclusiecriteria)

1. Apparently healthy children aged 0.5-12 years without signs of physical, mental or genetic disorders, and who are capable of participating in the study;
2. Participation of the child is approved (written consent) by parents and or caregivers.

The survey will be carried out in schools, in collaboration with the schools and health offices of the local government. Sampling procedure follows randomization design. Children in selected locations who fulfill our inclusion criteria will be recruited.

Belangrijkste redenen om niet deel te kunnen nemen (Exclusiecriteria)

Children who cannot fulfil the inclusion criteria.
