Verkorte titel

WoPaCoM (Work Participation of Workers with Common Mental Complaints)

Aandoening

Fatigue, minor depression, sick leave, work participation.

Ondersteuning

Primaire sponsor: Maastricht University

Overige ondersteuning: Fund = initiator = sponsor

Onderzoeksproduct en/of interventie

Uitkomstmaten

Primaire uitkomstmaten

Fatigue measured with CIS 20, and Depression measured with BDI, assessed at baseline and at 4, 6 and 12 months after inclusion.

Toelichting onderzoek

Achtergrond van het onderzoek

Minimal Psychological Intervention (MPI) vs care as usual The MPI is based on principles of cognitive behavioural therapy and self management by occupational health nurses. The number of consultations can vary from 1 to 10, during a period of max. 4 months. After the baseline measurement follow up measurements after 4, 6 and 12 months are carried out.

Doel van het onderzoek

Employees that comply to the inclusion criteria and receiving the MPI (Minimal Psychological Intervention), will improve more on scores on depression and fatigue than employees receiving care as usual.

Onderzoeksopzet

Baseline, 4, 6 and 12 months follow up.
