Onderzoeksproduct en/of interventie

Uitkomstmaten

Primaire uitkomstmaten

Carer: Self Rated Burden Scale- VAS, CarerQol-7D; CarerQol-VAS

Person with dementia: Neuro Psychiatric Inventory

Toelichting onderzoek

Doel van het onderzoek

Is an intensive multimodel multicomponent program for caregivers of people with dementia more effective than care as usual for the well being of the carer and the person with dementia

Onderzoeksopzet

base line; 3 months; 6 months

Onderzoeksproduct en/of interventie

7- day residential intensive training of carers of people with dementia. The training is an intensive multi-component and multi-model training comprising psycho-social and psycho educational interventions and training of practical skills. Parallel to this training their partners with dementia receive an own program with therapeutic components and pleasant activities.

The control group will receive care as usual.
