

Cluster headache and oxygentherapy. Is it possible to predict which patients will be relieved?

Gepubliceerd: 08-09-2009 Laatste bijgewerkt: 18-08-2022

We will study which factors differ between the responders to oxygen therapy and the non-responders. Factors that will be studied are for instance patient characteristics, headache characteristics, comorbidities and intoxications.

Uitkomstmaten

Primaire uitkomstmaten

We will study factors that differ between responders to oxygen therapy and the nonresponders. Factors that will be studied are for instance patient characteristics, headache characteristics, comorbidities and intoxications. The results will be obtained by questionnaires and by studying the medical file.

Toelichting onderzoek

Achtergrond van het onderzoek

We will study which factors differ between the cluster headache patients who respond to oxygen therapy and the cluster headache patients who don't respond to oxygen therapy. Factors that will be studied are for instance patient characteristics, headache characteristics, comorbidities and intoxications. The results will be obtained by questionnaires and by studying the medical file. It may be possible that as a secondary outcome these characteristics tell us something about the mechanism of action of oxygen and cluster headache pathophysiology.

Doel van het onderzoek

We will study which factors differ between the responders to oxygen therapy and the non-responders. Factors that will be studied are for instance patient characteristics, headache characteristics, comorbidities and intoxications.

Onderzoeksopzet

We will send questionnaires to the patients who suffer(-ed) from cluster headache.

Onderzoeksproduct en/of interventie

Oxygentherapy and we will send questionnaires to the patients who suffer(-ed) from cluster headache.

Deelname eisen

Belangrijkste voorwaarden om deel te mogen nemen (Inclusiecriteria)

The only inclusion criterium is to meet the cluster headache criteria of the international headache society for the diagnosis of cluster headache (ICHD-II)

Belangrijkste redenen om niet deel te kunnen nemen (Exclusiecriteria)

1. Under the age of 18;
2. Uncertainty about the diagnosis.

Onderzoeksopzet

Opzet

Type:	Observationeel onderzoek, zonder invasieve metingen
Onderzoeksmodel:	Anders
Toewijzing:	N.v.t. / één studie arm
Blinding:	Open / niet geblindeerd
Controle:	N.v.t. / onbekend
